Add Average Weekly Earnings AWE

Import · https://paiyroll.com/kb/add-average-weekly-earnings-awe/

Follow this guide if you need to insert some average weekly earnings for SSP or SMP after import.

Process

Usually, a single AWE value is sufficient for the month preceding the first SSP pay run. For SMP, you need to enter multiple values over a 2-month relevant period.

And the example below, we will add a 2000 payment on the 30th April 2025 for a monthly **m1** frequency:

- Employees > Update > State
- State > New > Create new entry
  - Key: **pay.AWE Sink.History**
  - Value: **[[\"2025-04-30\", \"m1\", 2000.00]]**
- Create
- **Update** the employee

Note how you need to wrap each string value carefully with a **\"** before and **\"** after.

You can add as many AWE **values** as needed, with different frequencies. You separate the payments with a comma. For example, here are 2 weekly **w1** payments:

```
[[\"2025-04-23\", \"w1\", 2000.00],[\"2025-04-30\", \"w1\", 2000.00]]
```
