Setting up Mobile Rocket

Integrations · https://paiyroll.com/kb/setting-up-mobile-rocket/

Works id

You must set up a **Works id** for every candidate. Without a unique Works id you will be unable to map shifts to the candidate. You are free to use any alphanumeric characters. Every candidate's Works id must be unique.

There are no restrictions for restarters - use a different or original Works id.

New fields

Be sure to add the following new Fields to your Rocket installation for paiyroll®:

1. End date (leaving date)
2. Starter Declaration (A B C)

Candidate/Worker Data feed

paiyroll column	Your file column specification
username	{Email} -> _.lower()
email	{Email} -> _.lower()
is_active=True	
title	{Title*}
name	{Forename} {Surname} -> _.replace('(', '').replace(')', '')

Shift/Timesheet Data feed

Below is a typical column mapping:

paiyroll column	Your file column specification
Works id	{Payroll Number}

paiyroll column	Your file column specification
Worker name	{Candidate Name}
Rate	{Standard Pay}
Units	{Standard (Decimal)}
Display as	{Started}{Location}{Standard (Decimal)}{Standard Pay} -> '{0} {1} {2}hrs x {3}'.format(_1[:16], _2, _3, _4)
Code	
Date	

Codes

You can specify up to 10 project Cost codes.

P45

You can transfer P45 information from Mobile Rocket to paiyroll®. However, most customers find it easier to avoid asking for and having this in the time and attendance system. Instead, on the rare occasions a P45 is provided, you can enter it directly into paiyroll® at any time.
