# Shift: exceeded shift number limit

Correcting Errors · https://paiyroll.com/kb/shift-exceeded-shift-number-limit/

This means you attempted to upload one more shift than you have numbered Shift Pay Definitions.

First, check that you intended to upload that many shifts for that employee, as this may be an error in the uploaded file or data feed.

However, if you did intend to and require that number of shifts, go to Set Up > Pay Definitions and add the next numbered shift (e.g., Shift 22 if the last one was Shift 21). Shifts are based on the Per Unit Template.
